

how to upcycle coffee

DISH & UTENSIL SCRUB

abrasiveness of the grounds helps to remove food buildup on hard-to-clean surfaces!

ODOUR REMOVER

place a bowl of used coffee grounds in your fridge to neutralise any odours.

FERTILISER

sprinkle onto the soil surrounding your plants. do not add too much!

INSECT REPELLENT

insects have been reported to be repelled by the scent of coffee grounds (slugs, bees, wasps, ants and snails).

SOAP

the coarse particles act as an exfoliating agent to remove dirt and dead skin.

COMPOST

can be used as a "green compost" and mixed with "brown compost" to maximise nutrient benefits!

grounds must be dried to be upcycled
Spread it on a tray & bake it at 160°C for 2 to 5 minutes
